

April Science Café

Privacy in the Nano City:

Humans and nano-
enabled communication
technologies

Friday, April 19, 2013

5:30 p.m. - 6:30 p.m.

Arizona Science Center

600 E Washington Street

Phoenix, AZ

(602) 716-2000

How might nanotechnology change our expectations of privacy?

Many things, from our Facebook pages to the use of electronic surveillance, are breaking down our notions of privacy.

In the Nano City, who will decide what is private and what is public?

This café will explore the concept of privacy in public spaces, and attempt to highlight some challenges to privacy with respect to emerging technology.

Science Cafés are free, informal discussions that bring together members of the community and university faculty to discuss how science and technology can change the future.

In the typical café, a scientist and a humanist speak for 5-15 minutes on a topic, with the rest of the time for the public to ask questions and present concerns.

Teachers receive 1 hour Professional Development for each Café attended.
