

November Science Cafe

Do Robots Need a Bill of Right? Implications of Artificial Intelligence

Friday, November 16, 2007 5:30 - 6:30 pm Arizona Science Center

600 E. Washington Street Phoenix, AZ 602-716-2000

Science Cafes are free, informal discussions that bring together members of the community and university scientists, to discuss how science and technology can change the future.

In the typical cafe, a scientist speaks for 5-15 minutes on a topic, with the rest of the time for the public to ask questions and present concerns.

A computer scientist and an attorney currently studying bioethics will discuss progress in artificial intelligence and how we should prepare for this new population.

Dr. Subbarao Kambhampati

Professor, Computer Science & Engineering Ira A. Fulton School of Engineering Arizona State University

Attorney David Calverley

Research Fellow Center for Law Science and Technology Arizona State University Law School

The Center for Nanotechnology in Society at Arizona State University (CNS-ASU) facilitates the involvement of the general public in nanoscale research and development, to build new capabilities for understanding and governing the power of nanotechnology to transform society. CNS-ASU is affiliated with the Consortium for Science, Policy, & Outcomes in the College of Liberal Arts and Sciences. CNS-ASU education and outreach activities are supported by the National Science Foundation under cooperative agreement #0531194.
