How do urban design and culture generate changes in the city?

The design and shape of our cities has been evolving. This Café will approach sustainable cities through the lenses of design and community engagement.

How can citizens be more involved in designing urban environments?

It will focus on the influence of new approaches to living and planning sustainably for urban regions.

Arizona State University

Science Cafés are free, informal discussions that bring together members of the community and university faculty to discuss how science and technology can change the future.

In the typical café, a scientist and a humanist speak for 5-15 minutes on a topic, with the rest of the time for the public to ask questions and present concerns.

Teachers receive 1 hour Professional Development for each Café attended.
